

CURRICULUM VITAE AND PUBLICATIONS CHRISTIAN BRÖER May 2024

University of Amsterdam, Department of Sociology, +31655409436, c.broer@uva.nl

I am associate professor of sociology interested in the interaction between health, everyday life practices and micro and macro politics. In the most general sense, I research the political origins of subjectivity in relation to biomedical processes. Conceptually, I aim to further develop medicalization theory. Empirically, I focus on cases like bodily (over)activity, microbes, sadness, (over)weight, mobile phone technology or aircraft noise. I am also interested in the way our research affects

(health) practices. Methodologically I try to advance qualitative methods through systematizing collaborative interpretative and longitudinal approaches. My career is a bit atypical since I first studied ballet, worked outside academia between my MA (cum laude) and the beginning of my PhD study and worked part-time since my daughter was born in 2000 until 2012. I am still keen on dancing, currently mostly Latin dances. I am leading a group of researchers called the SocioHealth team with whom I participate in the [Amsterdam Institute for Social Science Research](#) and in a number of interdisciplinary research projects: [Sarphati Etnografie](#), [MetaHealth](#), [MicroHealth](#), [Personal Microbiome Health](#), [CO-CREATE](#), [Urban Mental Health](#) and TimingHealth. I am member of the Workers Council and Co-founder and shareholder of [Panel software](#).

Teaching responsibilities

Within the last 10 years I have been teaching research projects, introduction to social sciences, introduction to sociology and medical sociology. Before, I have taught theory and methods courses. I have supervised and tutored more than 100 students at the Research Master, MA and BA in a very wide variety of subject fields. I have given numerous guest lectures in sociology, political science, anthropology, psychology, in Amsterdam, Utrecht, Rotterdam, Groningen, Germany, Switzerland and the UK.

Training junior researchers

It is my aim to support, encourage and train junior researcher and to support their careers through mentoring and collaboration. The first PhD candidate in one of my own research projects – Bert de Graaff – started to work as PostDoc before finishing his thesis and is now assistant professor in Rotterdam. At least 8 of my master students are accepted in a Ph.D. program (in Cambridge, Milan, Bologna, Leiden, Utrecht and 3 in Amsterdam). Many of my students have found employment at ministries, universities, care organizations or research firms. A master student won the national price for best qualitative research in 2007-2008. I have co-authored articles and chapters with several (former) students.

Public sociology

The most important public for researchers are students. I am trying to foster collaborative, creative and politically sensitive scholarship based training and empirical research.

The software we develop is enabling citizens to engage in social science around pertinent issues.

I have participated in public lectures, given a range of radio interviews (Radio 1, Radio 5, VARA, BNR, AmsterdamAcademy), published in newspapers and appeared in youtube videos on risk and politicization of research <https://youtu.be/rYWNh-sTZrU> <https://youtu.be/O1ziTbRKkng> . In 2015 participated in an expert hearing of the Dutch parliament on aviation.

Awards

2011	Routledge/Critical Policy Studies Early Career Achievement prize for the period 2007-2011
2011	Technical University Delft, Henk Sol price, for the innovative approach in 'Policy discourse and people's internal frames on declared aircraft annoyance
1996	First prize of the department of sociology and second in the national thesis competition.
